## **The Art of the New Urbanism**

**CNU 20: Exhibition and Publication**

May 9-12, 2012

The New Urbanist movement is dramatically transforming the way that illustrations and renderings are incorporated into the dialog of community planning and placemaking. New Urbanism has provided a means of visual communication that enables citizens from all walks of life to become engaged in planning their neighborhoods and communities. Vivid and compelling artwork, communicative renderings, and beautiful illustrations are all part of *The Art of the New Urbanism*. Here is your chance to show your best work and to contribute your ideas to the ongoing conversation. Submit your pieces today!
